PRESS RELEASE

FOR IMMEDIATE RELEASE:

**SolCool One, LLC Ships First Millennium
Solar Air Conditioner to India**

October 22, 2007, *Redlands, California* - SolCool One, LLC and Senergy Cooling Systems shipped the first Millennium branded split system to its authorized dealer in India. The all DC ductless split air conditioning system will debut in Hyderabad, India on October 24, 2007 at SolCool Technologies, Ltd. Open House.

SolCool One, LLC's distribution agreement with Senergy Cooling Systems of Israel resulted after terminating its relationship with GPM, Inc. / Aquacell Technologies in July of this year.

"We are looking and moving forward to delivering the two, three, and five ton Millennium systems manufactured by Senergy over the next twelve months to the thousands of global inquiries we have and continue to receive," said Clifford Sutton, SolCool One, LLC's Vice President of Global Sales and Marketing.

Mr. Sutton added that, "The Millennium Systems are a perfect fit in India with its low power, DC ceiling fan, lighting and air sanitizing options. The Millennium unlocks the gate to affordable off grid and on-site generated power lifestyles. The systems also feather in well to the grid with its scaleable battery bank that continues to operate during grid interruptions."

SolCool One, LLC is a global factory-direct distributor of energy saving and energy producing sustainable products. For more information, go to www.solcool.net or email info@solcool.net.
