PRESS RELEASE

FOR IMMEDIATE RELEASE:

**SolCool One, LLC Delivers the First
DC Millennium HVAC to Green & Clean Canada**

January 15, 2008, *Guelph, Ontario, Canada* - SolCool One, LLC and its manufacturing partner, Senergy Cooling Systems, delivered the vanguard Millennium direct current air conditioning/heating system to the Green & Clean Energy Company's showroom in Guelph, Ontario, Canada.

"We are very proud and excited to distribute this revolutionary product in Canada and the UK", Said Mark McNally, V.P. of Sales and Business Development for Green & Clean. "We have searched the planet for the most ingenious, highest quality and economically feasible systems to distribute and the Millennium fulfills our mission perfectly", McNally added.

This 1.5 ton, 18,000 BTU model of the Millennium line is the ductless split version direct current air conditioning and heating system and is currently on working display at the Green & Clean Guelph office. "The built-in "Smart Charger" in the Millennium system can efficiently operate on DC/AC current for uninterruptible climate control, lighting and DC charging for cell phones or laptops. There is nothing like the Millennium on the market", commented Clifford Sutton, V.P. Sales & Marketing at SolCool One, LLC.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems worldwide with its manufacturing partner Senergy Cooling Systems.
