PRESS RELEASE

FOR IMMEDIATE RELEASE:

**SolCool One, LLC and Senergy Cooling Systems
Deliver First DC Millennium HVAC to Mexico**

January 25, 2008, *La Paz, Mexico* - SolCool One, LLC and its manufacturing partner, Senergy Cooling Systems, delivered the first Millennium direct current air conditioning/heating system to the Baja Wind Technologies Showroom in La Paz Mexico.

“The Millennium is the only solution for true air conditioning from wind, solar, hydro or other renewable sources in the country”, commented Steve Thompson, President of Baja Wind, the Baja Peninsula distributor for Millennium Systems in Mexico. “The Millennium line of direct current climate control systems in the ½ to 5 ton range will combine well with our Pacwind line of vertical axis wind turbines in most on and off grid environments”, Steve went on to say.

The 1.5 ton, 18,000 BTU split version of the Millennium in La Paz demonstrates how the built in smart charger uses renewable, direct current and or alternate current grid sources to charge on-board deep cell batteries that power its 24 or 48 volt internal system. The battery driven Millennium can cool or heat uninterrupted for hours or days without any charging from outside sources at approximately 2/3 less power consumption than comparable conventional hardware.

“There is nothing like our Millennium System in the world”, stated Clifford Sutton, V.P. Sales & Marketing for SolCool One, LLC. “The Millennium will smart charge from solar, wind, hydro or any other direct current choice and if there isn’t any DC source it will automatically charge from a grid or generator source. If charging is interrupted, the Millennium System will continue to cool, heat, light and charge DC accessories such as cell phones and laptops for hours or days”, Sutton added.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand, “Millennia” in concert with its manufacturing partner Senergy Cooling Systems. The Millennium System line will expand to ½ to 5 ton split and package choices in 2008. Go to: www.solcool.net for more information on the Millennium and other energy consumption reduction products.
