PRESS RELEASE

FOR IMMEDIATE RELEASE:

SolCool One, LLC and Senergy Cooling Systems Deliver First DC Millennium HVAC to SolCool California

January 28, 2008, *Bakersfield, CA* - SolCool One, LLC and its manufacturing partner, Senergy Cooling Systems, delivered the first Millennium direct current air conditioning/heating system to its wholesale distribution partner, SolCool California's Showroom in Bakersfield California.

"The Millennium will fit nicely into the growing green building segment of residential and commercial construction", commented Don Freeze, President of SolCool California, the wholesale distribution HUB for the Millennium in central California. "The Millennium line of direct current climate control systems in the ½ to 5 ton range will perform well in the communication, augmentation, server and off grid market segments ", Mr. Freeze went on to say.

The 1.5 ton, 18,000 BTU split version of the Millennium in Bakersfield demonstrates how the built in smart charger uses renewable, direct current and or alternate current, grid sources to charge on-board deep cell batteries that power its 24 or 48 volt internal system. The battery driven Millennium can cool or heat uninterrupted for hours or days without any charging from out side sources at approximately 2/3 less power consumption than comparable conventional hardware.

"The number of deaths attributed to the heat in California intensified our resolve to bring the Millennium to the US market", claimed Clifford Sutton, V.P. Sales & Marketing for SolCool One, LLC. "The Millennium will smart charge from solar, wind, hydro or any other direct current choice and if there isn't any DC source it will automatically charge from a grid or generator source. If charging is interrupted the Millennium System will continue to cool, heat, light and charge DC accessories such as cell phones and laptops for hours or days", he added.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand, "Millennia" in concert with its manufacturing partner Senergy Cooling Systems. The Millennium System line will expand to ½ to 5 ton split and package choices in 2008.
