PRESS RELEASE

FOR IMMEDIATE RELEASE:

**SolCool One, LLC and Senergy Cooling Systems
Deliver First DC Millennium HVAC to Phoenix, Arizona**

February 1, 2008, *Phoenix, AZ* - SolCool One, LLC and its manufacturing partner, Senergy Cooling Systems, delivered the first Millennium direct current air conditioning/heating system to the AirCare, LLC Showroom in Phoenix, Arizona.

“The Millennium will fit nicely into the growing green building segment of residential and commercial construction”, commented Jerry Lenhart, President of AirCare, LLC, the wholesale distribution HUB for the Millennium in Phoenix, Arizona. “The Millennium line of direct current climate control systems in the ½ to 5 ton range will perform well in the communication, augmentation, server and off grid market segments “, Mr. Lenhart went on to say.

The 1.5 ton, 18,000 BTU split version of the Millennium in the Greater Phoenix area demonstrates how the built in smart charger uses renewable, direct current and or alternate current grid sources to charge on-board deep cell batteries that power its 24 or 48 volt internal system. The battery driven Millennium can cool or heat uninterrupted for hours or days without any charging from outside sources at approximately 2/3 less power consumption than comparable conventional hardware.

The Southwest is one of the major markets for the climate control industry in the US and bringing the Millennium to address the needs of the growing “green build” market sector in the Valley of the Sun is top priority”, stated Clifford Sutton, V.P. Global Marketing & Sales for SolCool One, LLC. “The Millennium will smart charge from solar, wind, hydro or any other direct current choice and if there isn’t any DC source it will automatically charge from a grid or generator source. If charging is interrupted, the Millennium System will continue to cool, heat, light and charge DC accessories such as cell phones and laptops for hours or days”, Sutton added.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand, “Millennia” in concert with its manufacturing partner Senergy Cooling Systems. The Millennium System line will expand to ½ to 5 ton split and package choices in 2008. Go to: www.solcool.net for more information on the Millennium and other energy consumption reduction products.
