**PRESS RELEASE**

**FOR IMMEDIATE RELEASE:**

**SolCool One, LLC Holds First Millennia Certified Training Class in Las Vegas, Nevada**

April 25, 2008, *Las Vegas, NV* - SolCool One, LLC and its manufacturing partner, Senergy Cooling Systems, delivered the first Millennia Sustainable DC (direct current) air conditioning/heating system to JusAlt, Inc., the wholesale distribution HUB for the Millennia in Las Vegas, Nevada. The 1.5 ton, 18,000 BTU split version of the Millennia in the Greater Las Vegas Valley demonstrates how the built in smart charger uses renewable, direct current (DC) and/or alternate current (AC) grid sources to charge on-board deep cell batteries that power its 24 or 48 volt internal system.

The battery-driven Millennia can cool or heat uninterrupted for hours or days without any charging from outside sources at approximately 2/3 less power consumption than comparable conventional hardware. “The Millennia will be a great addition for the homeowner to help conserve their fossil fuel utility bill”, commented Walt Michaels, President of JusAlt, Inc.

The Millennia line of direct current (DC) climate control systems in the 1-½ to 5 ton range will perform well in helping reduce the escalating energy costs being felt by homeowners in Las Vegas”, Mr. Michaels went on to say.

JusAlt will be leading the first SolCool.net Millennia training class held the first week of May at Quality Training Center in Las Vegas, Nevada. “This is the first of many certified Millennia training classes in the USA. Other certified Millennia training classes this year will be in Spain, Singapore, and Pennsylvania”, stated Cliff Sutton, Vice President of Sales and Marketing for SolCool One, LLC.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand, “Millennia” in concert with its manufacturing partner Senergy Cooling Systems. The Millennia System line will expand to ½ to 5 ton split and package choices in 2008. Go to: [www.solcool.net](http://www.solcool.net) for more information on the Millennia and other energy consumption reduction products.
