**PRESS RELEASE**

**FOR IMMEDIATE RELEASE:**

**US House Representative Jon Porter  
Presents Congressional Recognition To  
Senenergy Cooling Systems And SolCool One, LLC**

May 1, 2008, *Las Vegas, NV* - To recognize the commercial debut of the Millennia solar air conditioning and heating system, Nevada's 3rd District Representative, Jon Porter, presented Senenergy Cooling Systems and SolCool One, LLC with a Congressional Recognition Certificate at Quality Technical Training Center in Las Vegas, Nevada.

"This is the first of many Millennia system training classes to be held around the world and we are honored to be recognized by Nevada Congressman Porter and his Regional Representative, John Min", stated Joe Gamliel, President of Senenergy Cooling Systems. "The expert nature of Quality Technical Training Center and its EPA accreditation lends itself to the high quality, sustainable HVAC equipment Senenergy manufactures", Mr. Gamliel added.

The inaugural three day Millennia training attracted over 40 professionals, (HUB's) from around the world that have made a commitment to deploy the Millennia renewable air conditioning and heating systems in their various markets. Each HUB qualified to attend by investing in Millennia inventory, spare parts & logistical support, marketing and continuing education.

"The growing global demand for climate control and the need to reduce power consumption dictates that future HVAC systems be sustainable and the Millennia systems are the only ones in the world that make sense in the one to five ton range", commented Clifford Sutton, Vice President of Global Marketing and Sales for SolCool One, LLC. "These Millennia students are the vanguard for the transition that will occur over the next ten years", Mr. Sutton went on to say.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand, "Millennia" in concert with its manufacturing partner Senenergy Cooling Systems. The Millennia System line will expand to 1 to 5 ton split and package choices in 2008. Go to: [www.solcool.net](http://www.solcool.net) for more information on the Millennia and other energy consumption reduction products.
