FOR IMMEDIATE RELEASE:

## **SolCool One, LLC Helps Greensburg, Kansas Declare Its Energy Independence**

*July 4, 2008 - Greensburg, Kansas* - SolCool One, LLC recently completed the installation of its Millennia solar air conditioner and heater in Greensburg, Kansas at the Greentown office where Daniel Wallach is coordinating the sustainable rebuilding of the community.

SolCool donated the use of its 1.5 ton Millennia heat pump to the Greensburg rebuilding effort to demonstrate how air conditioning and heating can be powered 100% from the sun and wind. The LLC will be offering its Millennia systems to the sustainable model homes that Greentown is planning to construct.

“We’ll be integrating a hybrid wind and solar feed to the Millennia over the next 60 days to demonstrate how the Millennia will run completely independent of the grid”, said Daryl Emmons, SolCool One, LLC representative in Kansas.

SolCool One, LLC is currently delivering a new generation of renewable, DC HVAC systems under the brand “Millennia” in concert with its manufacturing partner Senergy Cooling Systems. The Millennia System line will expand to ½ to 5 ton split and package choices in 2008. Go to: [www.solcool.net](http://www.solcool.net) for more information on the Millennia and other energy consumption reduction products.
