

FOR IMMEDIATE RELEASE:

SolCool One, LLC Selects Supply Chain Partner

September 16, 2008, Redlands, CA - SolCool One, LLC; global distributor of the Millennia low power, direct current solar air conditioner and heater has selected Parker International as its factory verifier and container freight coordinator to ensure hardware integrity and timely deliveries throughout the world.

Current production of the 18,000 BTU, DC split heat pump in Guangzhou, China by its manufacturing partner Senergy Cooling Systems, combines up to 70% less power consumption over conventional hardware, a unique intelligent DC/AC charger power input, a proprietary DC adapter and deep cell energy storage that results in a revolutionary new way to effectively and efficiently climate control.

“This relationship with Parker International is critical in efficiently meeting the needs of all of our global wholesale distribution dealers in a world class way”, stated Mark Walsh, Manager of SolCool One, LLC. “With offices in all of our major markets and their sophisticated supply chain management, I am certain they will play a major role in our success”, Mr. Walsh added.

SolCool One, LLC and Senergy Cooling Systems will have a three and five ton version of the Millennia available in the Spring of 2009. For sales and dealer information please visit www.solcool.net or call 888-476-5266.
